

Project Development Engineer

Join a rapidly growing renewable energy company that matters to the future! We are looking to strengthen our **Project Development team** with a highly skilled and driven **Project Development Engineer**. You will be using your skills and experience to help the transition towards a Greek sustainable future. You will be based in our offices in Marousi, Athens with regular visits to the Project locations.

Responsibilities:

- Reporting to the Project Development Manager.
- Design, performance evaluation, and technical assessment of Renewable Energy utility projects.
- Coordinating and organizing the licensing and permitting process of utility scale Solar PV and Wind Energy projects.
- Conducting site surveys and evaluating technical viability of Projects, including suitability of project sites.
- Undertaking and reviewing software simulations of energy generation to determine system efficiency.
- Reviewing costs and assessing risks to ensure Projects are within agreed governance limits.
- Working closely with the Investment Committee and the Business Development Team.
- Monitoring and auditing Project maturing process by third party Developers.
- Measuring project performance using appropriate systems, tools and techniques and proactively following up as needed.
- Creating and maintaining comprehensive project documentation.

Qualifications:

- Degree in Mechanical or Electrical Engineering.
- Max of 4 years of work experience in Solar PV Project Design, Development and Licensing.
- Familiarity with Wind Energy and Energy Storage systems principles will be considered an advantage.
- Excellent knowledge of software programs (i.e. AutoCAD, PV Syst, PVcase, VisioSolar, MSOffice)
- Excellent organization and time management skills, team-player, strong communication skills.
- Professional working proficiency of Greek and English language.

Expressing Interest:

Please send your CV along with a Cover Letter to [**careers@national.energy**](mailto:careers@national.energy) by referencing in the Subject Title the **Vacancy Title**. National Energy is an Equal Opportunity Employer.

About National Energy

Headquartered in London and founded in late 2018, National Energy is a privately financed corporate group uniquely positioned to make large-scale investments and strategic acquisitions in clean energy solutions. The group's renewable energy investment platform focuses on **Solar, Wind and Storage** solutions from greenfield development to long-term asset ownership. National Energy's mission is to develop, finance and operate a minimum of **2GWp** of renewable assets in the next five years with a focus on accelerating the transition to clean and affordable power.

National Energy currently holds a significant footprint in **Greece** since entering the market as a newcomer in late 2018 with a portfolio of **400MWp** of Wind and Solar under Construction or in Operation and **3GWp** of Wind, Solar & Storage development pipeline in Greece. The group is led by an international team with deep industry experience and works with reputable developers and contractors to take early-stage renewable energy projects through the development process. Particular reliance is given on expertise sourced locally while building strong teams in the countries in which we operate. Further, National Energy fully adheres to ESG principles, holding above all else, ultimate respect for the environment and communities in which it operates.
