In case you are applying for an internship through ESPA, please reference the code in the subject **INTERNSHIP**.

National Energy is an Equal Opportunity Employer.

About National Energy

Founded in 2018 by ambitious entrepreneurs, National Energy is a US-backed, privately funded group active globally across the renewable energy sector. Headquartered in London and with operating capabilities across Europe and North America, National Energy is led by a highly experienced international team with deep industry and cross-border expertise. In Greece, our offices are located in Marousi, Athens.

Our mission is to develop, finance and operate **over 5 GW of renewable energy assets** in the next five years. With almost 500 MW of solar and wind assets, complemented by a further 3 GW under development, we operate across the full asset cycle from early-stage development through to long-term ownership in solar PV, wind, hydrogen and energy storage.

To support our rapid growth, we draw on an ever-growing team of engineering, project management, procurement, investment and asset management experts from a diverse mix of local and international talent. National Energy takes pride in working with reputable developers and contractors who have exceptional HSE standards to promote safety while maintaining best engineering practices.

Driven by our founders and entrepreneurial team, National Energy is committed to helping accelerate the world's transition towards a low-carbon economy. Sustainability is embedded in our company ethos, with ESG assessments incorporated across all business activities and investment decision-making processes. We recognize our responsibility towards the environment, our local communities, and the wider world around us. We strive to make a positive impact for current and future generations.

We are local. We are global. We are National Energy.
