DevOps Engineer
Full-time position in our headquarters in Patras

Our Company:

IRIDA Labs is a leading European based provider of **cutting-edge embedded computer vision** solutions, allowing devices to visualize and understand their surroundings through **on-device machine learning**. **PerCV.ai**, our unique end-to-end software and services platform is used for the development of machine vision applications addressing dynamic technology markets such as IoT, Industry 4.0, Smart Retail, and Smart Cities & Spaces.

Job Description:

We are looking for a passionate DevOps/MLOPs Engineer, with good understanding of the DevOps principles applied to code and/or data and Machine Learning (ML) models, to design, and work on streamlining processes related to code, data and ML models. The candidate should have excellent organizational, problem-solving skills and mainly willingness to learn new technologies.

Responsibilities:

- Building and setting up new development tools and infrastructure
- Working on ways to automate and improve development and release processes
- Testing and examining code written by others and analyzing results
- Ensuring that systems are safe and secure against cybersecurity threats
- Identifying technical problems and developing software updates and 'fixes'
- Working with software developers and software engineers to ensure that development follows established processes and works as intended

Required Skills:

Candidates should have a BSc degree in Computer Science/Engineering, any of the following:

- Experience as a DevOps Engineer or similar software engineering role
- Proficient with git (GitHub Actions) and git workflows
- Good knowledge of Ruby or Python
- Problem-solving attitude
- Collaborative team spirit
- Docker

Desired (but not mandatory) Skills:

- Typescript/Javascript, Go, C++
- Networking tools
- MLOps experience
- Machine Learning frameworks (PyTorch, TensorFlow)
- Microservices
- Vagrant

Benefits:

And these are some of the perks you receive when you join Irida Labs:

- Work in a dynamic and pleasant environment at a fast-paced company
- Discuss and interact with tech-leaders at a global scale, using cutting-edge technology and driving new markets
- Competitive remuneration package
- Huge room for creativity and innovation
- Private medical insurance
