

Full-stack software Engineer

Full-time position in our headquarters in Patras

Our Company:

IRIDA Labs is a leading European based provider of **cutting-edge embedded computer vision** solutions, allowing devices to visualize and understand their surroundings through **on-device machine learning**. **PerCV.ai**, our unique end-to-end software and services platform is used for the development of machine vision applications addressing dynamic technology markets such as IoT, Industry 4.0, Smart Retail, and Smart Cities & Spaces.

Job Description:

We are looking for a passionate **Full-stack Software Engineer**, with excellent programming skills, to design, and work on the development of the **PerCV.ai platform**. In this role, you should be able to work with an agile team of experienced programmers. The candidate should have excellent organizational, problem-solving skills and mainly willingness to learn new technologies.

Responsibilities:

- Develop high-quality software design and architecture
- Identify, prioritize, and execute tasks in the software development life cycle
- Develop tools and applications by producing clean, efficient code
- Design and implement services running on cloud or edge devices
- Code reviews and end-to-end application testing

Required Skills:

Potential candidates should have a BSc degree in Computer Science/Engineering, and any of the following:

- Experience in SW engineering
- Familiarity with Python, Go, JavaScript/TypeScript
- Experience with Vue.js, HTML, CSS, JavaScript, AngularJS/ReactJS
- API development, experience with HTTP and MQTT
- Microservice design and application containerization
- NoSQL databases

Desired (but not mandatory) Skills:

- Networking tools and security
- Experience with cloud platforms, architecture and methodologies- especially AWS
- Wireframing
- Embedded platforms
- Knowledge on machine vision and machine learning principles and algorithms

Benefits:

And these are some of the perks you receive when you join Irida Labs:

- Work in a dynamic and pleasant environment at a fast-paced company
- Discuss and interact with tech-leaders at a global scale, using cutting-edge technology and driving new markets
- Competitive remuneration package
- Huge room for creativity and innovation
- Private medical insurance
