

## **Field Service Engineer**

Are you looking for the next challenge, do you like traveling and enjoy being a solution orientated person? Are you our next Service Engineer? As we expand our team, we are actively seeking individuals who are eager for new opportunities!

### **Who We Are**

EUROBEND is a leading European machine manufacturing company. Our strong R&D department, resources and flexibility aim at developing innovative products, continuing our tradition of enhancing technology to meet the increasingly sophisticated demands of the industry. For more information: [www.eurobend.com](http://www.eurobend.com)

### **Your Role**

As a Field Service Engineer, your most important responsibility is to service, commission and maintain our machines at our customers. The work varies from short service jobs, lasting a few days to longer service jobs of several days.

### **Your Key Responsibilities**

- Hands-on during machine building.
- Preparing and executing installation-jobs.
- Conducting service visits.
- Troubleshooting production issues at customers' sites.
- Managing local employees in larger installation projects.
- Keeping in touch with the team and reporting about your progress.
- Training the customer and feedback results to your colleagues.
- Preparing your next project(s) and reporting on completed projects.
- Regular meetings with the team.

### **About You**

You are passionate about technology and machinery. You are independent, flexible and stress resilient. Furthermore, you like to work hands-on, have an analytical mind and strong problem-solving skills.

- Have a good knowledge of additional languages German, French or Spanish is highly desirable.
- Have an excellent command of the English language.
- Previous experience or studies in Mechanical / Electrical / Mechatronic Engineering or similar.
- Basic knowledge of electrical and controls engineering is an advantage.
- Are willing to travel globally.

### **We Offer**

- Stable and long-term collaboration based on mutual respect.
- Friendly working environment, encouraging professional learning and growth.
- Competitive remuneration package.
- Continuous training opportunities.
- An extensive and well-prepared on boarding period.
