About National Energy

Headquartered in London, National Energy is a privately financed corporate group uniquely positioned to make large-scale investments and strategic acquisitions in clean energy solutions. The group's renewable energy investment platform focuses on solar, wind projects, and storage solutions from greenfield development to long-term asset ownership. National Energy's mission is to develop, finance and operate a minimum of 2GWp of renewable assets in the next five years with a focus on accelerating the transition to clean and affordable power.

National Energy currently holds a significant footprint in Greece since entering the market as a newcomer in late 2018 with an operational portfolio of over 140MWp of solar and onshore wind. The group is led by an international team with deep industry experience and works with reputable developers and contractors to take early-stage renewable energy projects through the development process. Particular reliance is given on expertise sourced locally while building strong teams in the countries in which we operate. Further, National Energy fully adheres to ESG principles, holding above all else, ultimate respect for the environment and communities in which it operates.
